Version With Markings to Show Changes Made

6. (Amended) A method as claimed in [any one of claims 3 to 5] claim 3 wherein the variable portion is a member of a polypeptide library.
7. (Amended) A method as claimed in [any one of the preceding claims] claim 1 wherein steps (a) and (b) are performed iteratively for more than one cycle.
9. (Amended) A method as claimed in [any one of the preceding claims] claim 1 wherein the solid support system is particulate.
11. (Amended) A method as claimed in [any preceding] claim 1 wherein the immobilised means for biospecific interaction is a target molecule for the desired polypeptide.
12. (Amended) A method as claimed in [any one of claims 1 to 10] claim 1 wherein the immobilised means for biospecific interaction is a cognate binding partner for an affinity binding partner which forms a fusion protein with the desired polypeptide.
13. (Amended) A nucleic acid molecule or polypeptide when selected according to the method of [any preceding] claim 1.
